

AirVenture 2026 Forum - Tire Maintenance and Impact on Aircraft Safety

Aircraft Safety is a top priority, but there is one component that is often overlooked with varying consequences as a result: Aircraft Tires. Aircraft tires operate at the most extreme conditions for load and speed. They are extremely well engineered and tested, and when operated properly are relatively dependable and last an acceptable life. This course focuses on the importance of tire maintenance on aircraft safety and is designed for anyone who comes in contact with or uses aircraft tires including but not limited to pilots, maintenance technicians, flight line ground teams and flight school students.

AMT credit available!

To receive AMT credit fill out attendance sheet available at the Forum entrance.

The FAA Safety Center is centrally located on the EAA AirVenture grounds on the South side of the control tower. We are the large tan building with the rooftop deck facing the runway. Forums entrance is on the west side of the building.
