

Tools to Keep Us Safe - Doug Stewart

During this one hour live event, Doug Stewart will discuss Risk Management, and the Tools we use to measure risk to keep pilots safe. Risk management can be somewhat subjective depending on the pilots risk tolerances and abilities. The Risk vs Reward Equation might keep one pilot from flying in anything other than benign skies, while another may eagerly launch into menacing skies. Doug will present us tools to use to calculate potential risk, and make an appropriate go or no-go decision.

This presentation will be held during the Ninety Nine's Conference, at the Champlain Hotel, in Burlington Vermont. It is also free to the public, and will be held in the Adirondack Room of the Champlain Hotel, Burlington Vermont.
