

Weather Resources and Communicating With Your Mechanic

During this 2 hour event, we will discuss how a pilot can best prepare by checking proper weather sources during flight planning. We will also have a meaningful discussion on how to talk to your mechanic, and the importance of knowing what is or isn't being accomplished during the routine maintenance on your aircraft.

Proceed directly to the Watertown International Airport, located at 22564 Airport Drive, Watertown, New York. The Seminar will be held inside the FBO.

A message from the National FAASTeam Manager
