

Anatomy of a Mishap

You may never need this information on what to do in an in-flight emergency, but preparing NOW for that moment will boost your chances of living to fly another day. We will discuss some physics, some personal experiences, some techniques for survival, and even offer some advice for preventing emergencies from happening in the first place. Attendees will be better prepared to act appropriately in the event of an in-flight emergency.

Directions: Room 207C
