

Are You Out of Control

Since the invention of the airplane pilots have been plagued by loss of control and spin accidents. What causes a pilot to lose control? What causes an airplane to spin? More importantly, how can a pilot recognize and avoid situations that could lead to an accident of this type. And loss of control accidents are not just limited to airborne aircraft. Many pilots lose control of the airplane on the ground during the takeoff or landing roll. Join us for a discussion of the factors leading to loss of control, and how to recognize and avoid them.

Please use GPS or mapping software.
