

VMC IMC Meeting Waukesha Airport KUES

VMC Question of the Month: One focus area for improving safety revolves around Controlled Flight Into Terrain (CFIT). According to the FAA, what are some of the factors involved in CFIT accidents, and what precautions can be taken to avoid CFIT accidents?

IMC Question of the Month: You're about to depart on an IFR flight and although icing is not specifically forecast for your area, conditions include visible moisture and temperatures nearing freezing. At what point should you turn on your pitot heat?

Park in the Main Airport Parking lot, and then enter the Main terminal. The Conference Room is to your right.

If flying in, taxi to the ramp to the east of the main terminal building and bring your own chocks and tie downs.

A message from the National FAASTeam Manager
