

EAA Chapter 1674 Monthly Safety Meeting

The two-hour meeting starts at 09:00 with a social event with refreshments, followed by a brief business meeting, followed by the guest speaker.

Emily Shelton, a Certified Flight Instructor (CFI), will provide a comprehensive analysis of her real-world emergency landing on I-10. The presentation focuses on critical learning objectives including aeronautical decision-making (ADM), risk management, and emergency procedures. Attendees will gain actionable insights through a detailed review of the specific challenges encountered during the engine failure and the subsequent decision to use an interstate highway. The session emphasizes practical safety lessons and refining personal safety protocols, offering pilots a structured framework to improve their emergency preparedness and situational awareness.
