

## How to Handle a Fire in Flight

Suddenly you start to smell the burning of something within the cockpit, and it's not going away. The unexpected might just be happening in front of your eyes, a fire in flight. Most of us are never taught within our flight training on how to adequately deal with a fire in flight, besides being aware that a fire extinguisher exists in the first place.

This seminar marks the beginning of our new series on handling emergencies. To kick it off, we have invited Jason Miller, an award winning CFI, to discuss how pilots can effectively handle fires. Fires are triggered by a series of events, starting with the smallest things, and end up spreading like wildfire. What might be the first indications of a problem lurking beyond the dashboard? Not every situation is the same, so how does a pilot respond to these issues? Throughout this seminar we will discuss the various ways you can most expeditiously handle these life-threatening scenarios.

### Event Details

**Sat, Nov 23, 2019 at 12:00 PST**

**San Carlos Flight Center**

655 Skyway Road, 215  
215

San Carlos, CA

**Contact: DAN KELLY DYER**

**(415) 305-9051**

**dan@sancarlosflight.com**

**Select #: WP1596867**

**Service Provider DAN KELLY  
DYER n/a**

If you want to make sure that you are ready to handle this unthinkable experience and stay alive, don't miss this seminar.

Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.
